

RM-10781

I am OPPOSED to this RM-10781.

The petitioner is creating a "crazy quilt" nightmare of privileges. This will only make the current mixture of subbands and emissions even more impossible to monitor. FCC monitoring stations as well as ARRL Volunteer Observers will be under additional stress in assuring FCC Rules and Regulation compliance.

The license class referenced already has more than enough cw privileges to encourage them to practice cw. And they are not utilizing these more than sufficient privileges now.
